SUMMARY

- 5 years of professional experience. Agile learner and passionate with an interest in innovation, startups, and design. Skilled in front-end and mobile/web development, with a focus on writing well-performing, scalable, and maintainable code. Possessing five years of programming experience in building engaging user interfaces and robust applications. Committed to continuously improving skills and staying updated with the latest industry trends.

PROFESSIONAL EXPERIENCE

Nov'24 - Present **Fair Teknoloji** **fairteknoloji.com.tr**

• I supported Adil Katılım Bankası A.Ş. (https://www.adilkatilim.com.tr) in obtaining its operating license and passing inspections conducted by the Central Bank of the Republic of Türkiye.
Tech Stack: Vue 3 (Composition API), Nuxt 3, Vite, Pinia, Vitest and Flutter.
• I contributed to the modernization of the Türkiye Basketball Federation website using up-to-date technologies (https://www.tbf.org.tr), which is published.

Software Developer
Tech Stack: Vue 3 (Composition API), Nuxt 3, Vite, Pinia, Vitest and Flutter.

Jan'22 - Nov'24 **Innova** **innova.com.tr**

Part of the Turk Telekom Group Company, with its 1400-strong professional staff, is a leading information technology solutions company in Turkey.

Software Development Specialist

- Was responsible for the development, maintenance, and repair of MobilPort, Turk Telekom's on-premise application designed to improve employee engagement and internal communication via in-house information and social platforms. This application was fully integrated with Turk Telekom systems, making a broad range of services accessible to all employees. (Tech Stack: TypeScript, Angular, Ionic, Cordova, SASS)
- Handled new package deliveries for Android and iOS platforms and updated versions for new developments to ensure stable, timely app releases.
- Prepared Proof of Concepts (PoC) and conducted software analysis with the backend team.
- Determined the front-end stack for new projects and assessed project requirements for the team.
- Prepared the backlog for sprints and addressed customer requests.
- Used Agile methodologies, holding daily stand-up meetings to discuss progress and blockers, and conducted retrospectives at the end of each sprint to reflect, learn, and continuously improve.
- Tested items with cross-functionality among other team members.
- Designed all TTPort pages for a new and better UI/UX. (Tech Stack: HTML, CSS, JQuery, SharePoint Designer)
- Contributed to the UI/UX modernization of TTWiFi (AKM), focusing on improving the user experience and interface design. (Project Completed, Tech Stack: Vue2)
- Took part in the UI/UX development of Yanyana, using Flutter to enhance the user interface and experience for the first release. (Project Completed, Tech Stack: Flutter, PlayCanvas)

Oct'21 – Dec'21 **Ticimax** **ticimax.com**

Ticimax provides e-commerce infrastructure services to over 11,000 companies. With its strong infrastructure developed, it provides its users with the opportunity to make sales not only in Turkey but also throughout the world.

Front-End Developer

- I was involved in the development using Nuxt.js for an e-commerce services company's warehouse project, which included barcode scanning and shelf organization with a terminal device.
- We were working within the framework of agile project.

Teck Stack: Vue (SPA:Nuxt.js), Element UI, HTML5, CSS(SASS), JS(ES6), Api-Doc(Swagger)

Feb'21 – Sep'21 **MeydanSoft** **meydaneticaret.com**

We are here to serve you with our experts who have marketing experience in all digital platforms. We are ready to provide consultancy so that you can adapt to the expectations of the business world or find special solutions for your corporate development needs.

Front-End Developer

- Created personalized themes and integrated them with the company's infrastructure.
- Ensured clients' requests were met through customized solutions.

- Closely collaborated with the back-end team.
- Contributed to enhancing the company's main page.

Teck Stack: Vue (SPA:Nuxt.js), Element UI, HTML5, CSS(SASS), JS(ES6), Api-Doc(Swagger)

May'20– Feb'3 **Gelal** **gelal.com**

I was in charge of revamping and making the company's existing website responsive, while also addressing any additional requirements. Moreover, I was responsible for developing customer and transporter web applications using Vue for front-end duties

Front-End Developer

- Revamped and made the company's existing website responsive.
- Addressed any additional requirements for the website.
- Developed customer and transporter web applications using Vue for front-end duties.
- Development and design of payment screens cargo tracking screens.
- Assisted with testing in the mobile application.
- Set up Google AdSense, Analytics, Tag Manager and Hotjar(Website tracking) for marketing team.

Teck Stack: HTML5, CSS3, Bootstrap(v4), JS(ES6), Vue(v2) && MDB UI, .NET CORE MVC(Razor Pages)

Jan'17 – Dec'19 **Scotty** **scotty.com.tr**

Scotty is a platform that allows ordinary motorcyclists to take passengers (and food, packages, and anything carryable) wherever they want to go at an affordable price. Also, I was the first employee of Scotty and I had my #1 ID on the Database.

Intern, Development Team

- Developed the company's main website using React.
- Managed social media for a brief period until a more experienced individual took over the responsibility.
- Provided support to the marketing team in design matters.
- Took on additional tasks related to React Native for driver and passenger applications from the software team.

Teck Stack: HTML, CSS, JS, CMS(as WordPress), Social Media Management, Photoshop, Adobe Illustrator, Premier Pro

2016 – 2017 **Vidpanel** **vidpanel.com**

My first workplace, where my mandatory high school internship was completed, was Vidpanel. It is known for providing all the tools broadcasters need to immediately start their own white-label video platform. It was a great start for building my network. The company was a small team of four people.

Intern, Development Team

- Created customizable WordPress templates tailored to our company's clients for selling purposes.
- I developed diverse live broadcast website templates for our clients.
- I took charge of managing social media accounts and curating creative and captivating posts to elevate our online presence.

Teck Stack: HTML, CSS, JS, CMS(as WordPress), Social Media Management, Photoshop, Adobe Illustrator, Premier Pro
